OUR PARTNERS WORLDWIDE

The engineering office **Krieg & Fischer Ingenieure GmbH** is globally active in the biogas sector. Alongside the design, planning, approval planning, execution planning, preparation and involvement in the awarding of the contract, overall management of the construction site and commissioning of the biogas plants, we also offer consulting services, prepare surveys, expert reports, insurance reports, studies and plant optimisation measures, inspect technical safety equipment and provide operator services and training courses – simply everything required in the biogas sector.

100% INDEPENDENT

We operate independently of subcontractors and can develop and implement the best technical and economical solution for your particular application. We place emphasis on the fact that there is no specific Krieg & Fischer procedure. Here we primarily focus on the Input Material, to which we tailor the process technology. This is the only way to develop an optimised system for your biogas plant.

Krieg & Fischer Ingenieure GmbH supplies expertise in the field of biogas technology.

We view ourselves as service providers, covering the entire spectrum. This includes simple farm-scale biogas plants and also complex, multi-stage, industrial fermentation technologies for food industry waste, kitchen waste fermentation or residual waste fermentation plants.

100% SERVICES WITHOUT HIDDEN COSTS

OUR OFFER

Just tell us about your substrates, we will prepare for you free of charge

- ✓ an energy calculation
- ✓ a cost assessment

for your individual, customized biogas plant!

OUR SERVICE OFFERING

Tailor-made solutions for your needs

- Feasibility studies
- Calculations
(Mass & energy balances, cost assessment)
- Concept development
- Permits & approval
- Engineering
- Tenders and commissioning
- Construction
- Start-up
- Optimization / retrofits
- Supervision / consulting

**Tailor-made solutions
for your needs**

TECHNICAL DETAILS

- Concrete / steel tank
- Internal / external heat exchanger
- Top mounted / side mounted / submersible mixer
- Mesophilic / thermophilic
- One stage / two stage digestion
